Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including mean for controlling: causes the introduction of a first amount of NOx specific reactant, or the precursor there of, to contact the NOx absorbent insufficient to completely reduce the total NOx stored on the NOx absorbent when the first catalyst is inactive for reducing NOx to N₂; and causes the introduction of a second amount of NOS specific reactant, or the precursor thereof, to contact the first catalyst when the first catalyst is active for reducing NOx to N₂ wherein the second amount of NOx specific reactant is of a sufficient amount such that NOx-specific reactant slips the first catalyst and contacts the NOx absorbent to reduce the NOx stored on the NOx absorbent and regenerate the NOx absorbent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
